

DEW EXPORT WEARS

Since 1991

100% Pure Wool and Yarn

Why Us?

We are chosen by our clients because of these major reasons:

- Wide distribution network
- Transparent dealings
- Quality assured products
- Competitive price range
- Well-structured warehouse
- Ethical business practices

100% natural

Wool is 100% natural grown year-round by Pakistan by large numbers of sheep, consuming a simple blend of water, air, sunshine and grass.

100% biodegradable

When a wool fibre is disposed of, it will naturally decompose in soil in a matter of years, slowly releasing valuable nutrients back into the earth.

100% renewable

Pakistan sheep produce a new fleece every year, making wool a completely renewable fibre.

Wrinkle resistant

At microscopic level, each Merino wool fibre is like a coiled spring that returns to its natural shape after being bent. This gives Merino wool garments a natural resistance to wrinkles.

Innovative

Fashion designers and active wear brands can choose from a range of innovative treatments and manufacturing techniques to create unique textures and finishes on Merino wool garments.

Naturally breathable

Merino wool is one of the most breathable fibres. Wool fibres can absorb large quantities of moisture vapour then move it away to evaporate into the air.

All kind of colors available on demand

THREAD VERSUS YARN

THREAD

Thread is a long, thin strand of cotton, nylon or other fibers used for sewing

Used for sewing, darning, and embroidery

Lighter

Thinner

Can be used to make fabrics or textiles

YARN

Yarn is a continuous strand of twisted natural or synthetic fibers

Used for knitting, crocheting, weaving, sewing, etc.

Heavier

Thicker

Only used for sewing, i.e., making a pattern for a shirt, dress, etc. or darning when there is a tear or hole
